— The MAILING DATE of this communication appears on the cover sheet beneath the correspondence address —

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE Three (3) MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

☒ Responsive to communication(s) filed on 10/10/01

☐ This action is **FINAL**.

☐ Since this application is in condition for allowance except for formal matters, **prosecution as to the merits is closed** in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

Disposition of Claims

☒ Claim(s) 1 and 4 to 18 is/are pending in the application.

Of the above claim(s) _____ is/are withdrawn from consideration.

☒ Claim(s) 10 is/are allowed.

☒ Claim(s) 1, 11, 12 and 18 is/are rejected.

☒ Claim(s) 4 to 9 and 13 to 17 is/are objected to.

☐ Claim(s) _____ are subject to restriction or election requirement

Application Papers

☒ The proposed drawing correction, filed on 10/10/01 is ☒ approved ☐ disapproved.

☐ The drawing(s) filed on _____ is/are objected to by the Examiner

☐ The specification is objected to by the Examiner.

☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. § 119 (a)-(d)

☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119 (a)-(d).

☐ All ☐ Some* ☐ None of the:

☐ Certified copies of the priority documents have been received.

☐ Certified copies of the priority documents have been received in Application No. _____

☐ Copies of the certified copies of the priority documents have been received

in this national stage application from the International Bureau (PCT Rule 17.2(a))

*Certified copies not received: _____

Attachment(s)

☐ Information Disclosure Statement(s), PTO-1449, Paper No(s). _____

☐ Interview Summary, PTO-413

☐ Notice of Reference(s) Cited, PTO-892

☐ Notice of Informal Patent Application, PTO-152

☐ Notice of Draftsperson's Patent Drawing Review, PTO-948

☐ Other _____

Office Action Summary

Art Unit: 2875

DETAILED ACTION

Response to Arguments

1. Applicant's comments with respect to claims 11, 12 and 18 have been considered but are moot in view of the new ground(s) of rejection. The indicated allowability of claim 3 of Office action of July 18, 2001 is withdrawn in view of the discovered reference to Steinhart. Delay in rejection of claim 3 in view of Steinhart, Kidder, Benjafield and Ryan is regretted. Rejection of amended claim 1 under Steinhart in view of Kidder, Benjafield and Ryan follows.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Steinhart (prior art previously cited) in view of Kidder et al. (prior art previously cited), Benjafield (prior art previously cited), and Ryan (prior art previously cited).

Steinhart discloses a handbag assembly comprising a bag (10) having walls, a main compartment (41) having an opening into the main compartment, a side compartment (55), a cover member (56) removably closing over the side compartment, a fastening member such as a zipper (column 5, line 21) securely attached about a portion of a perimeter of the side compartment and along a portion of a perimeter of the cover member for holding the cover member in a closed condition over the side compartment, a carrying strap (19) having ends attached to the bag, a fastener (16, 17) for closing the opening into the main compartment, a plurality of pockets (20, 32, 60) attached to the bag, and a coin pouch (39) attached to the bag in side compartment. However, Steinhart does not disclose a light emitting means removably attached to the bag, a mirror attached to the cover member, and a hook assembly attached to one of the walls of the bag in the main compartment.

Art Unit: 2875

Kidder et al. teach that it is known in the art to include light emitting means (10) removably attached to the bag so that the light emitting means can illuminate the interior of the bag during darkness and can be used from one bag to another bag.

Benjafield teaches a mirror (9) securely attached to a cover member (7) to allow the user to gaze into the mirror when necessary.

Ryan teaches a hook assembly (1, figure 1) securely attached to one of the walls of the bag for holding keys and other object which would inherently include mace.

It would have been obvious to one skilled in the art to provide Steinhart with light emitting means removably attached to the bag, as shown by Kidder et al., for not only illuminating the interior of the bag but also using from one bag to the other bag. It would have also been obvious to one skilled in the art to provide the cover member of Steinhart with a mirror, as shown by Benjafield, for allowing the user to gaze when necessary. It would have been obvious to one skilled in the art to provide Steinhart with a hook assembly, as shown by Ryan, for holding keys and other objects. Note that closing the coin pouch with a zipper, as opposed to other fastening means, would have been an obvious matter of design choice which provides no unusual, unobvious, and/or unexpected result and is therefore deemed to fall within a purview of an ordinary engineering designed technique to provide any fastening means as long as it closes the coin pouch.

4. Claims 11 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Steinhart (prior art previously cited) in view of Kidder et al. (prior art previously cited), Benjafield (prior art previously cited), and Ryan (prior art previously cited).

Steinhart discloses a handbag assembly comprising a bag (10) having walls forming a main compartment (41), the main compartment having an opening, a side compartment (55) having a cover member (56) pivotally mounted on the walls, a fastening member such as a zipper (column 5, line 21) releasably fastening a portion of a perimeter of the cover member to a portion of a perimeter of the side compartment, a carrying strap (19) having ends attached to the bag, a fastener (16, 17) for closing the opening into the main compartment, a plurality of pockets (20,

Art Unit: 2875

32, 60) attached to the bag, and a coin pouch (39) attached to the bag in side compartment. However, Steinhart does not disclose a light emitting means removably attached to the bag, a mirror attached to the cover member, and a hook assembly attached to one of the walls of the bag in the main compartment.

Kidder et al. teach that it is known in the art to include light emitting means (10) removably attached to the bag so that the light emitting means can illuminate the interior of the bag during darkness and can be used from one bag to another bag.

Benjafield teaches a mirror (9) securely attached to a cover member (7) to allow the user to gaze into the mirror when necessary.

Ryan teaches a hook assembly (1, figure 1) securely attached to one of the walls of the bag for holding keys.

It would have been obvious to one skilled in the art to provide Steinhart with light emitting means removably attached to the bag, as shown by Kidder et al., for not only illuminating the interior of the bag but also using from one bag to the other bag. It would have also been obvious to one skilled in the art to provide the cover member of Steinhart with a mirror, as shown by Benjafield, for allowing the user to gaze when necessary. It would have been obvious to one skilled in the art to provide Steinhart with a hook assembly, as shown by Ryan, for holding keys.

5. Claims 11, 12 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Strong (prior art previously cited) in view of Hill (prior art previously cited), Benjafield (prior art previously cited), Steinhart (prior art previously cited) and Ryan (prior art previously cited).

Strong discloses a handbag assembly comprising a bag (10, 110) having walls forming a main compartment (12, 112), the main compartment having an opening (24, 124), a side compartment (30, 130) having a cover member (32, 132) pivotally mounted on the walls, a fastening member such as a zipper (38, 40, 42, 138, 140, 142) releasably fastening a portion of a perimeter of the cover member to a portion of a perimeter of the side compartment, a carrying strap (figure 3) having ends attached to the bag, and a fastener (126) or such as a draw string (26) for closing the opening into the main compartment. However, Strong does not disclose a plurality

Art Unit: 2875

of pockets attached to the bag, a light emitting means removably attached to the bag, a mirror attached to the cover member, a coin pouch attached to the bag in side compartment, and a hook assembly attached to one of the walls of the bag in the main compartment.

Hill teaches that it is known in the art to secure a plurality of pockets (figure 1) to the bag to organize and store different items in the bag and to include a light emitting means (10) removably attached to the bag so that the light emitting means can illuminate the interior of the bag during darkness and can be used from one bag to another bag.

Benjafield teaches a mirror (9) securely attached to a cover member (7) to allow the user to gaze into the mirror when necessary.

Steinhart teaches a coin pouch (39) attached to the bag in side compartment for holding coinages

Ryan teaches a hook assembly (1, figure 1) securely attached to one of the walls of the bag for holding keys.

It would have been obvious to one skilled in the art to provide Strong with a plurality of pockets and light emitting means removably attached to the bag, as shown by Hill, for not only storing and organizing different items within the bag but also for illuminating the interior of the bag from one bag to the other bag. It would have also been obvious to one skilled in the art to provide the cover member of Strong with a mirror, as shown by Benjafield, for allowing the user to gaze when necessary. It would have further been obvious to one skilled in the art to provide Strong with a coin pouch, as shown by Steinhart, for holding coinages. It would have been obvious to one skilled in the art to provide Strong with a hook assembly, as shown by Ryan, for holding keys.

6. Claims 4 to 9 and 13 to 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claim 10 is allowable over the prior art of record.
